Intermediate/Advanced

Suggested bible: New International Reader's Version

Begin bible study

If you are starting a new lesson, go over the vocabulary

Have the students read the 1st paragraph to themselves. Check for any new vocabulary words or idioms.

Ask one student to read the paragraph.

Have the students turn to the passage in the bible (get number)

Read the passage as a class.

Go back through each verse. Check for understanding. Look for any idioms in the passage, They may not tell you what they don't understand so you must initiate it.

Repeat above with the next paragraph.

SPEAK SLOWLY!!!!

If you are using this with Intermediate I students or lower, you will need to do repetition with the vocabulary. I would suggest that you pull out sentences from the paragraphs with the new vocabulary and teach them separately (ie – repetition)
